

Carlos Alvarez Ponce - Full Stack Developer

Lima, Peru · carmm41@gmail.com · +51 938 847 564 · github.com/bluexdev · linkedin.com/in/carlos-alvarez-ponce

// PROFILE

Software Engineering student at UPC with production experience building full-stack systems, automation workflows, payment integrations, REST APIs, and AI-assisted business tools. Focused on reliable backend architecture, clear product execution, and measurable delivery.

// CORE STACK

Next.js · TypeScript · React · Python · FastAPI · NestJS · PostgreSQL · Supabase · Docker · Redis · Vercel · Railway · N8N · Make · WhatsApp Cloud API · OpenAI API

// FEATURED PROJECTS

BluJoy - E-commerce in production

Next.js, TypeScript, Supabase, Culqi, Cloudflare R2. Live checkout, idempotent payment webhooks, JWT/HMAC protected endpoints, and automated digital fulfillment. Impact targets tracked: ~1.2s LCP, 300+ orders, 0 duplicate charges.

ReparaFlow - Repair center SaaS

NestJS, React, Prisma, Docker, Railway. API architecture, PostgreSQL data model, reverse proxy, CI/CD, and technical documentation.

Business AI Assistant

FastAPI, OpenAI, PostgreSQL, Redis. Natural-language inventory, price, and availability queries connected to web/social channels with conversational memory.

// EXPERIENCE

Karina Import - Technology Solutions and Digital Transformation

Automation of commercial and customer-support processes; external API integrations including WhatsApp Cloud, Facebook Graph, Bsale, N8N, and Make.

Fertigyn - IT Systems Consultant

Requirements analysis, functional and technical documentation, software configuration, implementation support, testing, and user documentation.
